SOLLATEK GWR

WI-FI NETWORK SNIFFER MODULE FOR GEOLACTION ASSET TRACKING

Description

GWR is a Wi-Fi network sniffer module which when connected to a Sollatek host device such as FFA and GMC provides remote asset tracking.

The GWR collects network information from nearby Wi-Fi networks and sends to the host device. Via the GSM module in the host device, the Wi-Fi information is transmitted to an online portal which calculates the location of the GWR and therefore, customer's asset.

The GWR can be easily retrofitted to a Sollatek host device via a connection cable. The GWR is powered from the host device.

The GWR has a status LED to indicate the operation mode of the device.
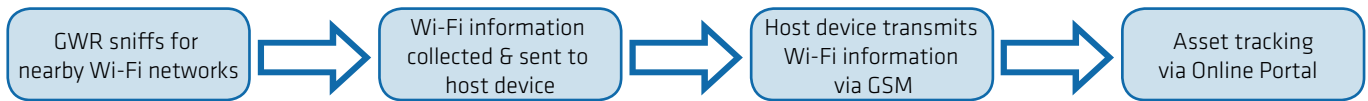

Features

- Wi-Fi Sniffer Module - does not connect to Wi-Fi network
- Precise Asset Tracking via the online portal
- Online portal provides details of location, device information and power status, as well as other performance data recorded from the host
- Connects to Sollatek FFA (EMD) and GMC0 (GSM Modem)
- Powered from Host Device
- Easily retrofitted to a Sollatek Host Device via a connecting cable
- A secondary device such as a display can be connected to expand user interactions with the controller via the second micro USB port
- Ultra low power consumption - Sleep mode to minimise battery usage
- LED status indicator
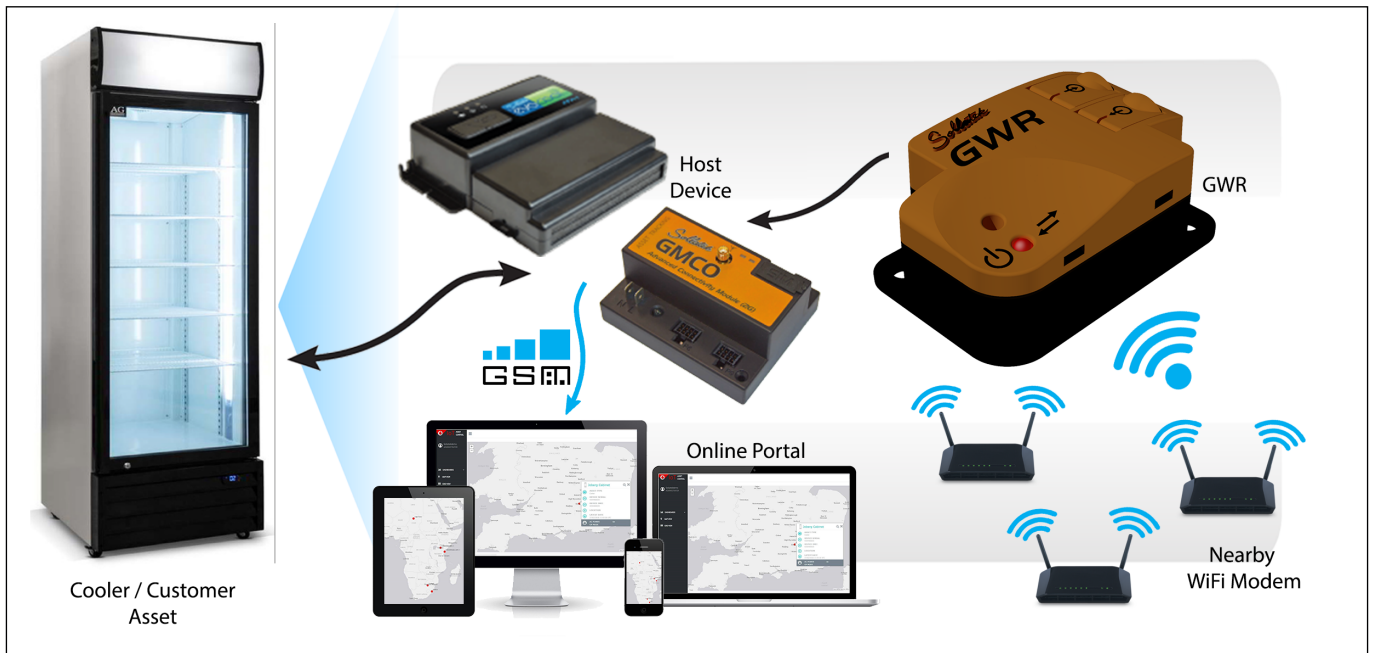

Technical Specification

Wi-Fi	2.4 GHz 802.11 b/g/n/e/i Support Wi-Fi Direct (P2P) Support
Connectors	GWR to host device using serial data via Micro USB connector GWR to Secondary device using serial data via second Micro USB connector
Power	Power from Host device Ultra-low power design
Mechanical	Mounting: 2x screws or double-sided adhesive pad (provided) Size: 52.0 x 34.0 x 22.3 mm Weight: 18 g Operating temperature: -40°C to 65°C IP rating: IP52*

* Not tested, subject to mounting orientation
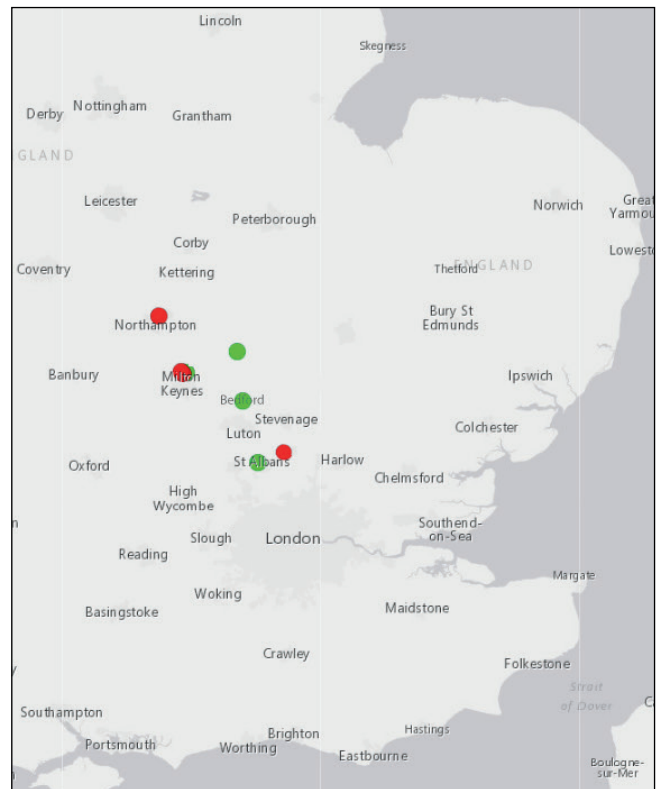

Typical application

GWR sniffs for nearby Wi-Fi networks → Wi-Fi information collected & sent to host device → Host device transmits Wi-Fi information via GSM → Asset tracking via Online Portal
